# AutoSig Systems, Inc announces the selection of its AutoDoc product by Progressive National Bank

**ATLANTA, GA – MARCH 8, 2011  NEWS RELEASE**

AutoSig Systems, Inc. (ASI) of Sugar Hill, Georgia, announces the selection and successful implementation of its Document Imaging product - AutoDoc - by Progressive National Bank of Mansfield, Louisiana.

The AutoDoc system provides community banks value in Document Management with secure browser technology.  The system is designed to allow customers the ability to view and work securely with imaged files throughout the entire organization while providing electronic versions of all critical documents to facilitate backup and restore procedures to meet their disaster recovery plans.

"The main reason we needed a Document Imaging system was to satisfy our Disaster Recovery needs. When hurricane Katrina hit Louisiana it made Disaster Recovery a high priority issue in our state," said Ms. Lora Evans, Vice President of Operations at Progressive National Bank. "But, we knew the decision about which system to get would be driven by the lending department. We looked at a number of Document Imaging systems and AutoDoc met all of our requirements for a great price. The value of the ASI system was almost too good to be true." Wayne Davis, the President of Progressive National Bank said "Once we looked at features and price, the decision was obvious'.

At Progressive National Bank, even the President goes into the field to review and make loans. AutoDoc is great for lending officers because they can access their loan files wherever they are without taking the time to bother personnel at the home office to retrieve files and provide information. Loan officers get their information immediately and nobody has to take the time to look up files, send the information, and re-file the documents. "It is like taking your desk with you wherever you go", say Kade Rogers Vice President of Lending at the bank.

Mr. Davis says implementing a document imaging system also lets them save substantial costs by reducing paper and reducing their consumption of printer ink, along with copy and FAX toner cartridges. This allows the bank to be environmentally conscious and Go Green. Employees and customers feel better about the bank when they see the bank's efforts to reduce their carbon footprint.

Ms. Evans likes the fact that AutoDoc is very simple to use. "I let branch employees do their own scanning and access so I can be a banker, not a computer person".

Progressive already had positive experiences with ASI as a result of their use of an earlier version of AutoSig. They knew they could expect a trouble free system with good support when needed. With the new system, Mr. Rogers says they have "almost no problems. In the rare case we have an issue we just call ASI and we always get great support. ASI is great at answering questions and solving problems".

## About AutoSig Systems

ASI is an innovator of  image document technology that invents and develops solutions for Document and Signature/ID Imaging, Enterprise Content Management (ECM) and  Services for the banking and financial community. For over 31 years, banks have selected our software and services to positively impact their operations and help them better verify transactions and store important documents. As an independent provider, our customers remain solidly connected to us, and receive the benefit of continued use of our image technologies. While technology changes frequently force banks to reevaluate their vendors, ASI's customers have come to count on us to remain current and employ the latest technology to address their needs. Customers continue to count on ASI even when their other systems change or become outdated. With a history of creating and inventing efficient algorithms and compressions we have addressed and perfected the details of delivering image technology over busy networks. Many of our bank customers say, "it just simply works well.' With over 30 years of customer relationships built upon trust and the importance of technology, ASI is an ideal partner to deliver your image automation needs, when the image counts.
